

CW 704 ALFALFA

Proven Genetic Innovation

Ideally Suited to the Southwest Production Area

Management Profile

- High yielding, superior quality alfalfa variety ideally suited to the Southwest production area.
- Specifically researched, developed and tested for the various soil conditions and production practices of the southwestern United States.
- CW 704 is a fall-dormant variety adaptable to various cutting schedules.
- Features multiple pest resistance and superior forage quality.

Performance For the Way You Farm

- Outstanding head to head yield performance versus the newest Competitive varieties and technologies.

| Brand | Variety | CW 704 Percent Yield Advantage |
|-------------------|-------------|--------------------------------|
| WL Research | WL 457 | 18% |
| Pioneer | 58N57 | 12% |
| Producer's Choice | Sutter | 12% |
| America's Alfalfa | 13R Supreme | 11% |
| Syngenta | Tahoe | 10% |
| Syngenta | Tulare | 6% |
| WL Research | WL 525HQ | 6% |
| | Yolo | 5% |
| DeKalb | DK 180ML | 2% |

Field Appearance at Harvest Maturity

- Medium dark green foliage
- Bushy, full canopy
